

# Cyxtera

## Your Digital Transformation Starts Here

**With technology constantly changing, data volumes ever-increasing and consumer expectations at an all time high, having the right infrastructure has become more important than ever.**

With 61 data centers in 29 markets, Cyxtera is a global leader in colocation and digital infrastructure solutions. Offering a complete suite of power, space, interconnection, bare metal, and remote management solutions, Cyxtera's software-defined platform and highly interconnected ecosystem allow for on-demand provisioning of in-house and partner solutions, providing enterprises with the foundation they need to modernize their IT infrastructure and compete in today's digital world.

### Future-Ready Platform

**Cyxtera's API-driven, carrier-neutral platform was built from the ground up with the goal of designing the most future-ready, extensible data center company in the world.**

We aim to increase customer agility through intelligent automation that allows for rapid time-to-solution, enables robust remote monitoring and control, reduces operational costs, and makes interconnectivity a breeze.

Our densely connected partner ecosystem and powerful digital exchange enable automated provisioning of in-house and partner services, allowing your enterprise to lean into an as a service model that provides operational and financial flexibility to quickly pivot as market dynamics shift.

## World-Class Colocation Solutions

Beyond space and power, Cyxtera offers exceptional performance and reliability as well as significant cost savings relative to in-house management. Our comprehensive solution helps you streamline data center deployment and reduce time-to-market.

### Our offering includes:

- Custom data center installation and set-up.
- FedRAMP compliant high-security environments.
- Access to secure cages, cabinets, and structured cabling.
- On-demand support from our highly experienced in-house operations team.

## Direct, Private Interconnection

With 180+ cloud on-ramps and 1000+ network providers, Cyxtera enables your enterprise to build the secure, direct, and dynamic connections it needs to scale digital business and accelerate growth.

Cyxtera's carrier-neutral, densely-connected global data center footprint and thriving partner ecosystem makes it easy for your enterprise to establish on-demand connections to a huge range of network, cloud, and technology service providers.

### Drive digital transformation initiatives forward with:

#### Cloud On-Ramps

Save up to 7X on egress fees by establishing direct connections to all leading cloud providers, including Azure, AWS, and GCP. Most facilities provide 3ms or lower latency.

#### On-Demand Blended Bandwidth

Rapidly provision fault-tolerant connectivity via multiple Tier 1 IP backbones and deploy fast, cost-effective IP connections in minutes.

#### Direct Connectivity

Initiate secure, reliable, direct, and low-latency connections across our expansive network of customers and partners.

#### Fully-Automated Provisioning

Cyxtera's digital exchange provides rapid interconnect, pay-as-you-go pricing, and click-and-connect access to an ecosystem of network and technology service providers.

## Enterprise Bare Metal: Available On-Demand

Our fully automated provisioning platform provides seamless access to enterprise-class infrastructure, including best-in-class bare metal servers from NVIDIA, Nutanix, Fujitsu and HPE.

### Cyxtera's Compute as a Service model offers the best of all worlds, including:

- On-demand compute power that can handle even the most bandwidth-intensive AI/ML workloads.
- Reduced capital expenditures and a predictable monthly bill.
- The ability to rapidly scale up to meet business needs.

## Smarter Remote Management

Standing in sharp contrast to the clunky outdated interfaces typically offered by data center operators, Cyxtera's customer portal boasts not only the superior functionality of a REST API-driven architecture, but also a highly intuitive user experience that brings you closer to their data center environments than ever before, enabling you to:

**Monitor and manage every aspect of the data center in real-time.**

**Easily automate recurring tasks.**

**Seamlessly integrate with existing systems.**

**Quickly connect to customers, partners and service providers.**

## Why Cyxtera?

# Offering the Speed, Scale and Agility Your Digital Business Demands

Cyxtera provides deeply connected and intelligently automated infrastructure to businesses around the world – enabling them to scale faster, meet rising consumer expectations and gain a competitive edge.

More than **2,300 leading enterprises** around the world **trust us** as a **strategic platform partner**.

Our customer-centric approach to innovation provides our customers with the foundation they need to succeed in today's digital world.

### Flexible, Future-Ready Platform

Our API-first approach provides a truly future-ready and extensible platform, enabling maximum flexibility, cross-platform versatility, and custom solutioning.

### The Perfect Blend of Agility and Control

Cyxtera maximizes your ability to compete in today's digital economy by combining the financial and operational flexibility of the cloud with the performance, reliability, and security of enterprise-grade infrastructure.

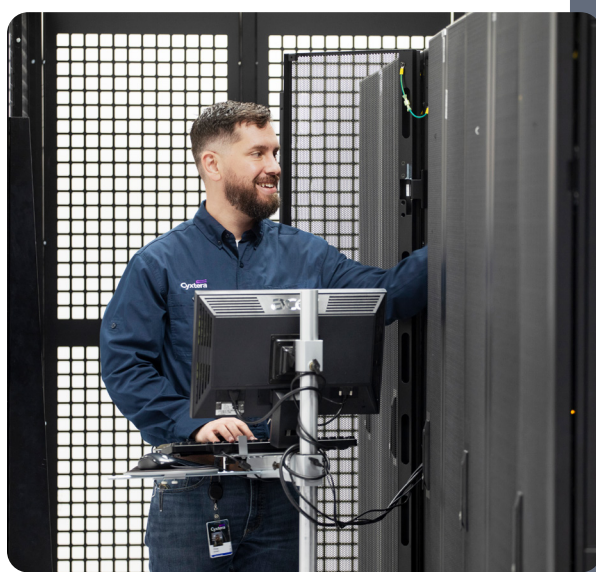

### Intelligent Automation

From powerful dashboards to robust automation tools, our remote management capabilities are best-in-class, delivering an intuitive user experience that brings you closer to the data center than ever before.

### Infrastructure On-Demand

Built on a software programmable and massively scalable network fabric, Cyxtera's digital exchange offers on-demand provisioning and customization of all aspects of the data center, including storage, compute, networking, and management.

Working with **Cyxtera** means knowing you are supported by a trusted, global partner who is ready to take you anywhere you want to go.
