

Cyxtera Smart Cabinets

Your Data Center, On Demand.

For businesses looking to benefit from the scale and speed of the cloud while retaining the control, performance, and security of dedicated infrastructure, Cyxtera Smart Cabinets offer the best of both worlds. Offering point-and-click provisioning of dedicated, on-demand colocation cabinets complete with built-in power and an integrated, configurable, core network fabric, smart cabinets allow for rapid deployment of infrastructure and dramatically accelerated time to market.

Smart Cabinets provide enterprises with:

Scale Rapidly — Without Compromising on Performance, Control, or Cost.

Run enterprise workloads on world-class hardware, benefit from reliable, high-performance connectivity and extend your data center environment with the simplicity and agility of software.

Increased Agility.

Leverage the financial and operational flexibility of as-a-Service solutions to move FAST — expanding to new markets and spinning up new business models in record time.

Flexible Bandwidth.

Adapt to changing business requirements by scaling capacity as needed, without waiting for hardware to be delivered.

Instant Compute Power.

Rather than wait months for your servers to be delivered, automated, on-demand provisioning allows you to get started immediately.

Powerful Remote Access.

Maximize productivity from anywhere in the world with powerful, automated tools powered by Cyxtera's intuitive API-driven customer portal.

Deep Connectivity.

Enjoy low-latency, direct connections to all major cloud providers, and access to a robust global ecosystem of network and technology service providers.

Reduced Complexity.

Cyxtera's innovative software allows you to simplify and automate the delivery, installation, and configuration of your colocation infrastructure.

Transform Your Digital Business

Cyxtera's deeply connected, intelligently automated global data center footprint and thriving partner ecosystem enable your enterprise to establish on-demand connections to a huge range of network, cloud, and technology service providers, with access to the flexible solutions you need.

Drive digital transformation initiatives forward with:

Cloud On-Ramps

Save 7X on egress costs by establishing direct connections to all leading cloud providers, including Azure, AWS, and GCP. Most facilities provide 3ms or lower latency.

Direct Connectivity

Initiate the secure, reliable, direct, and low-latency connections your enterprise needs to scale digital business operations and accelerate growth.

On-Demand Internet Bandwidth

Rapidly provision fault-tolerant connectivity via multiple Tier 1 IP backbones and deploy fast, cost-effective primary or backup IP connections in minutes. Capacities range from 10 Mbps – 10 Gbps.

Fully Automated Provisioning

Cyxtera's Digital Exchange platform provides rapid interconnection, predictable monthly billing and click-and-connect access to an ecosystem of network and technology service providers.
