

Future-Proof Your Hybrid IT with Cyxtera

→ Hybrid IT enables increased agility, scalability, and cost optimization for modern enterprises

The modern enterprise, challenged by the demands of digital transformation, requires an IT infrastructure that is agile, scalable, and cost efficient. A hybrid approach to IT provides the infrastructure businesses need to accomplish these goals.

The benefits of Hybrid IT are numerous, including increased agility allowing businesses to rapidly scale operations according to marketplace demand.

Businesses also retain control of their data and IT resources—crucial for ensuring regulatory compliance and data security.

With Hybrid IT, businesses can choose the most cost-effective option for each workload using a hybrid mix of on-premise, private cloud, and public cloud resources. This flexibility enables them to respond quickly to changes in demand.

Hybrid IT is the key to unlocking the full IT potential of the modern enterprise.

Why migrate to Cyxtera?

- A global footprint of 61 data centers in 28 markets
- Robust carrier-neutral interconnection services with rapid, low-latency, direct connections
- A thriving partner ecosystem of network, compute, and storage technology providers
- Future-ready, intelligently automated platform
- Software-powered, self-service portal for on-demand provisioning and remote management of data centers

→ The Solution: Flexible Hybrid IT Infrastructure Options

Offering a complete suite of power, space, interconnection, compute bare metal, and remote management solutions, Cyxtera's software-defined platform and highly interconnected ecosystem allows for on-demand provisioning of in-house and partner solutions and provides enterprises with the foundation needed to modernize IT infrastructures and compete in today's digital world.

Smarter and more agile than traditional colocation providers, Cyxtera offers on-demand provisioning services and a software-programmable network for rapid extendibility and interconnectivity. By blending physical colocation with as-a-Service offerings, Cyxtera provides cloud-like agility with the security, control, and performance of the traditional data center.

More than 2,300 leading enterprises around the world trust Cyxtera as a strategic platform partner. We think ahead and innovate infrastructure so you don't have to.

Customers can choose from an array of offerings to future-proof a Hybrid IT strategy:

SmartCabs

Click-to-provision instant access to colocation cabinets featuring built-in power and an integrated, configurable, core network fabric.

Enterprise Bare Metal

Click-to-provision access to HPE ProLiant, Nutanix, Dell, and Fujitsu servers to efficiently adjust compute power to changing business needs.

On-Demand Storage

Zadara® Advanced Storage on-demand offers the power of enterprise-class data storage and management with the convenience of the cloud.

On-Demand AI/ML Compute

Avoid significant capital outlays yet still quickly and easily provision AI and ML workloads with as-a-Service access to powerful NVIDIA® DGX A100 systems.

→ Use cases

Moving to Hybrid IT can be a complex undertaking for any organization. Cyxtera helps simplify Hybrid IT by providing a flexible infrastructure that can be adjusted to meet changing needs, such as:

Tech Refreshes

Cyxtera's sophisticated platform makes it easy to upgrade a dedicated, fully controlled environment simply by provisioning new resources via a web portal or API and migrating data and applications to new hardware. This eliminates downtime and ensures a smooth transition.

Disaster Recovery & Business Continuity

Cyxtera keeps businesses up and running in the event of outages or disasters with use of redundant power supplies and critical data backups.

High-Bandwidth Workloads

Cyxtera's powerful network provides the speed and reliability needed for resource-intensive applications.

Data Center Migration & Consolidation

With our predictable, monthly pricing model, companies can avoid rigid contracts and costly capital investments.

→ Our Services

Colocation

Cyxtera offers one of the largest retail colocation footprints in the world. We can provide a range of Remote Hands services to manage routine operations, including server reboots, telecommunications support, equipment rack and stack, OS loads, and tape backups. Once we help companies architect their infrastructure environment, our experienced operations team provides support every step of the way so enterprises can focus on strategic IT initiatives.

Interconnection

As one of the largest interconnection providers, Cyxtera's carrier- and cloud-neutral, densely connected global data centers deliver the local, global, and cloud connectivity options needed for today's distributed Hybrid IT. Through our extensive platform, companies can deploy virtual cross connects and private connectivity within our facilities, across a metro, and allowing for speed and simplicity of data center interconnections to accelerate time-to-market.

On-demand Infrastructure

Cyxtera's SmartCabs and Enterprise Bare Metal platforms provide the security, control, and performance of dedicated infrastructure in an on-demand OpEx model. Point, click, and provision ready-to-use colocation cabinets and workload-ready compute using the Cyxtera Portal. Deployment time is reduced from months to days and lowers infrastructure costs by 25-50%.

→ Why Cyxtera?

Offering the Speed, Savings, and Flexibility a Digital Business Demands

Faster Time-to-Market

Deploy IT infrastructure in minutes, not months, with on-demand provisioning and connectivity.

Reduced Complexity

Cyxtera's simple, consistent interconnection model makes it fast and easy to establish connections both inside and outside the data center.

Maximum Visibility

Get complete visibility into all existing connections and easily add new ones via our powerful, fully automated platform.

Flexible, Cost-effective Billing

Avoid rigid contracts and costly capital investments with our predictable, monthly pricing model.

Reduction of Hidden Cloud Costs

Save up to 7X on cloud egress costs by establishing direct connections to cloud providers via Cyxtera data centers.

Hybrid IT Strategy Development

With 300+ unique service providers, including cloud on-ramps, and 1,400+ deployments, Cyxtera enables enterprises to build secure, direct, and dynamic connections to scale digital business and accelerate growth.
