**Green Cloud**

**Backup & Archiving as-a-Service**

Your data is a very valuable asset; it enables your business. Therefore it deserves to be protected in the best possible and efficient way!

---

**Our specialized Green Cloud Alliance partner in your country can advise you how to best protect your data irrespective of the location of the source data; both on premise as well as cloud based data can be protected. With our Enterprise Grade Data Security service, you make sure the local legislation is met and full compliance is guaranteed.**

---

**BACKUP & ARCHIVING**

The requirements for an enterprise-wide protection of data are becoming increasingly complex, but at the same time more important. And data protection itself has become more demanding, with requirements for protection against operational problems, protection of data across sites and even against corruption, security breaches or cyber-attacks. Backup and archive solutions can prevent that from happening, but costs will also be a factor. Data and applications need to be protected to avoid costly business disruptions and meet compliance requirements. But having a cost-effective and application-aware backup and archiving solution can be a big challenge. Without careful consideration, the costs can go sky high. This is where the Green Cloud services offer you a cost-effective alternative.

---

**WHAT DOES THIS SERVICE OFFER:**

- Fully functional and secure backup and archiving service
- Hassle free enterprise-grade data management
- Almost unlimited capacity and scalability
- Full multi-tenancy/company support and management
- Turnkey solution without large upfront investments (pay-per-use)
- Broadest application and hypervisor support
- Full redundant set-up over at least two datacenters
