

# Cyxtera Data Center Interconnection Portfolio

Quick, easy, and secure connectivity for all your colocation needs.

Enterprises thrive when they have the ability to quickly connect with service providers, partners, and customers.

The demands of cloud computing, business continuity, mobility and Internet of Things (IoT) have rapidly increased the number of strategic connections needed to handle rapidly growing volumes of data. Managing these diverse connections can be complex, costly and require long lead times. Your organization can suffer financially if you are not able to optimize connectivity with the right partners at the right time.

## THE SOLUTION: CYXTERA INTERCONNECTION SERVICES

Cyxtera colocation data centers give you access to a robust interconnection ecosystem and standardized portfolio of interconnection services. You can quickly and easily engage with a broad range of telecommunications carriers, ISPs, dark fiber providers, business partners, cloud and content providers, healthcare and financial exchanges. With Cyxtera's interconnection services, your colocation data center can become the nexus of your hybrid IT infrastructure.

## CYXTERA INTERCONNECTION PORTFOLIO

Cyxtera's interconnection products are designed to be efficient and allow connections to be deployed in a fast and secure manner. These products are available to all colocation customers in Cyxtera data center facilities.

### Connecting Inside the Data Center

- Cyxtera Meet Me Room**  
 A secure, provider and customer neutral interconnection location within a Cyxtera data center campus
- Ecosystem Connect**  
 Enables quick and easy cross connects to service providers and business partners in the data center via a cable bundle from the customer's colocation environment to the Cyxtera Meet Me Room
- Cross Connect**  
 A simple, low-latency connection between data center customers made within the Cyxtera Meet Me Room
- Intra Customer Connect**  
 Bypasses the Cyxtera Meet Me Room to connect a Cyxtera colocation customer's non-contiguous spaces

## BENEFITS

**Reduced network cost** versus in-house data center by avoiding local loop charges and increased competition from multiple network providers vying for your business

**Faster time to market** with connections to service providers and partners in 2 business days or less

**Reduce complexity** with a consistent interconnection model across all Cyxtera data centers globally

Connecting Outside the Data Center

- Riser Connect**  
 Enables connections between Cyxtera and non-Cyxtera data centers and interconnection points within the same multi-tenant building
- Metro Connect**  
 Provides connections to all Cyxtera locations, major "carrier hotels," and interconnect points within a metro area
- CXD IP Connect**  
 A blended Internet bandwidth service available in select Cyxtera data centers
- Facility Entrance Services**  
 Conduit and facility entrance for fiber or wireless signals originating outside the Cyxtera data center

HOW IT WORKS

Customers utilize Ecosystem Connect as the "On Ramp" to establish connections with Cyxtera ecosystem members and Cyxtera network products within the Cyxtera Meet Me Room. The diagram below provides a visual representation of all of the interconnection products listed above.
