

Explore the difference in Enterprise Storage On-Demand with Zadara

The ultimate storage solution; simple, reliable and secure.

As today's modern enterprises are having to keep pace with customers in an increasingly on-demand culture, new storage concerns are coming to the surface. Capacity utilization and physical space challenges surmount as businesses keep adding boxes and racks in their data centers as their data store grows. The need for a new solution is paramount.

As enterprise businesses scale, data storage requirements continue to increase and become more complex. With the adoption of hybrid IT, the challenges and headaches caused by disparate workloads and shadow IT are becoming all too familiar.

The Solution: Achieve Financial and Operational Flexibility with Enterprise Storage On-Demand

Now you can deploy advanced storage on demand at Cyxtera, powered by Zadara, and reduce your financial and operational risks. Zadara's proven solution combines the functionality of an enterprise storage with the agility of a cloud model.

Zadara's industry-standard hardware and patented software delivers the power of enterprise-class data storage and management - with the convenience of the cloud.

Any data type. Any protocol. Any location.

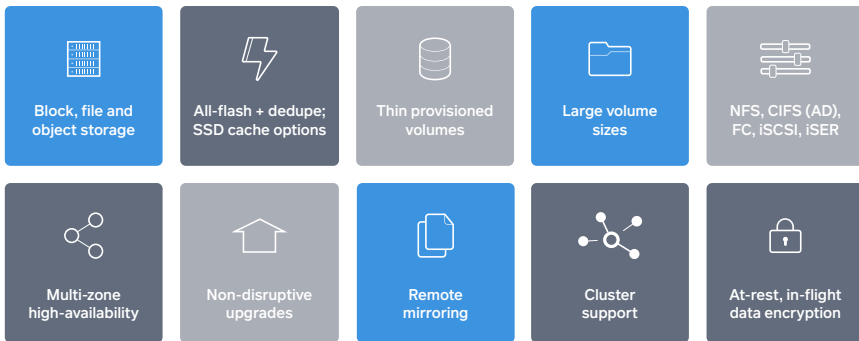

The Zadara logo is the word "zadara" in a lowercase, blue, sans-serif font.

Who is Zadara?

Zadara's Advanced Storage on Demand at Cyxtera data centers worldwide and you get all the power of enterprise storage as a fully-managed, 100%-OpEx service that allows you to operate more efficiently and effectively. Zadara's proven storage solution combines the functionality of enterprise storage with the agility of a cloud model. Use Zadara on CXD and at Cyxtera data centers to get a technology refresh without CapEx costs, implement a multi-tier backup-as-a-service solution, create a private cloud with all the capabilities of your data center, and much more.
