Service Description

Cyxtera Riser Connect

Last Updated: September 1, 2020
The terms set forth in this Service Description ("Service Description") apply to colocation services provided by Cyxtera to customer from time to time (the “Services”). With respect to a Service, “Cyxtera,” “we,” or “us” means (1) if customer has entered into a service order, statement of work or other signed agreement (the "Order") with respect to such Service, the applicable affiliate or subsidiary of Cyxtera Data Centers, Inc. that is a party to such Order, or (2) if customer has not entered into an Order with respect to such Service, (a) if such Service is not a Federal Service, the applicable affiliate or subsidiary of Cyxtera Data Centers, Inc. set forth in the table below, or (b) if such Service is a Federal Service, Cyxtera Federal Group, Inc. “Federal Service” means a Service that is sold by Cyxtera to a (i) U.S. Federal Government Agency, (ii) customer that has notified Cyxtera that such Service is being purchased for use by such customer in fulfillment of, or for purposes of satisfying its obligations under, a contract for a U.S. Federal Government Agency(ies), (iii) customer that has notified Cyxtera that such Service is being purchased for incorporation of such Service into a product or service of such customer to be provided by such customer to a U.S. Federal Government Agency(ies), or (iv) partner or reseller that has notified Cyxtera that it is reselling such Service to a U.S. Federal Government Agency(ies). “U.S. Federal Government Agency” means any agency or department that is an instrumentality of the United States under the executive, legislative or judicial branch of the United States government, or any independent instrumentality of the United States, such as the U.S. Securities and Exchange Commission or the U.S. Federal Communications Commission.

1 Introduction

Cyxtera operates a standard method of interconnection between ecosystem partners within its data centers. As part of Cyxtera’s data center interconnection portfolio of products, Riser Connect offers customers the ability to connect their environment within the Cyxtera data center and a 3rd Party (non-Cyxtera) provider located within the same building. Customers can utilize Riser Connect to gain access to additional service providers or connection parties collocated in the same building but within another provider’s suite. Connecting parties in 3rd party locations in the same building are considered On-Net providers to the building, but not On-Net to Cyxtera.

1.1 Cyxtera Customer Support Portal

The Cyxtera Customer Support Portal (the “Portal”) provides management access to the Cyxtera interconnection product portfolio including but not limited to, subscription status, inventory viewing, management of entitlements, and customer support. See the Cyxtera Customer Guide for more information about the Portal.

The management access for Riser Connect through the Portal is limited to the connection between the customer environment in the Cyxtera data center and the 3rd party suite. Additional cross connects or other services that are purchased from a 3rd party provider or service partner are not available for management within the Portal.

1.2 Availability

Riser Connect is available in following Cyxtera data centers:

2. Product Description

Riser Connect is a single-mode fiber or copper connection between Cyxtera and 3rd party providers and is delivered between floors or suites in a multi-story, multi-provider facility, such as an Internet gateway or carrier hotel. Riser Connect includes cabling media, connectors and patch panels (if required) to deliver the service. Riser Connect terminates on the Cyxtera side within the Cyxtera Meet Me Room ("MMR") and connects to an available port on a customer's Ecosystem Connect to connect through to the customer environment. Cross connects within the 3rd party suite are included through Cyxtera (where available) or may be ordered directly from the 3rd party provider.

2.1 Cabling Media and Connectors

Riser Connect is delivered utilizing single-mode fiber with LC connectors or copper with RJ45 connectors. An Ecosystem Connect is required to be installed prior to ordering of Riser Connect. Ecosystem Connect provides connectivity between the customer's environment and the Cyxtera MMR. Any cross connects within the Cyxtera MMR needed to support Riser Connect are included at no additional cost and do not require a separate order. Unless the customer selects a specific
port assignment during the provisioning process, Cyxtera will deploy Riser Connect to the next available port on a customer’s Ecosystem Connect bundle. If no ports are available or there is no Ecosystem Connect bundle in place, the Cyxtera Implementation Specialist will contact the customer to coordinate the order of the required Ecosystem Connect service.

Customers may not access the Cyxtera MMR to complete connections. Terminations can only be performed by Cyxtera staff.

2.2 Termination Options
The standard termination for Riser Connect is between the Cyxtera MMR and a patch panel within the interconnection area of the 3rd party suite.

A cross connect from the 3rd party provider is required to complete the connection between the Cyxtera 3rd party patch panel and the service provider with which the customer wishes to establish connectivity. Cyxtera will order the 3rd party cross connect on behalf of the customer based on the Letter of Authority/Connecting Facility Assignment ("LOA/CFA") provided by the customer defining the Z-end connecting party's termination location (see the Cyxtera LOA/CFA Guide for more details).

2.3 Diversity Options
Cyxtera does not offer diversity for Riser Connect.

2.4 Latency Standards
Cyxtera’s interconnection design standards provide connectivity utilizing the most efficient routes available. However, due to the variety of design elements that could be associated with each individual Riser Connect deployment (number of floors traversed, building design, etc.) latency may vary.

2.5 Service Diagram
The following depicts a common example of a Riser Connect deployment.
3 Service Delivery and Support
The following outlines Cyxtera’s roles and responsibilities in the service delivery of Riser Connect. While specific roles and responsibilities have also been identified as being owned by the customer, any roles or responsibilities not contained in this document are either not provided with the service or assumed to be customer’s responsibility.

3.1 Provisioning
Cyxtera will provide the following provisioning Services:
- If not previously completed, granting Portal access to administrative users using default administrator privileges and system preferences
- Design, installation and test of cabling between the customer’s Ecosystem Connect patch panel in the Cyxtera MMR to the patch panel in the 3rd party interconnection area
- Physically label all components – cabling, patch panels, ports
- Update inventory within the customer’s account for viewing in the Portal

Customer is responsible for the following provisioning activities:
• Ensuring an Ecosystem Connect is installed prior to ordering Riser Connect
• Providing an LOA/CFA for the Z-end connecting party’s termination location within the 3rd party location meet me area.

3.2 Support
Cyxtera employs skilled on-site technicians in each of its data centers. If the customer requires support with their Riser Connect service, they may request assistance from technicians by creating a case within the Portal. Cyxtera will provide all reasonable assistance to the customer while abiding by Cyxtera policies. Support charges may be incurred. See the Cyxtera Customer Guide for more information about obtaining such support from Cyxtera.

3.3 Incident and Problem Management
Cyxtera does not actively monitor uptime for Riser Connect. Any service interruption should be reported by the customer via a case in the Portal. Cyxtera will provide incident and problem management services (e.g. classification, recording, escalation, and return to service) pertaining to the infrastructure associated with the Riser Connect service.

3.4 Security
Cyxtera will provide security for the aspects of the Service over which it has sole physical and administrative level control. Cyxtera will use commercially-reasonable efforts to provide data center security, protection of cabling within the cable troughs and/or trays within the data center and administrative controls for access within the facility where the service is provided. Security and access controls will be implemented per Cyxtera standard operating policies. See the Cyxtera Customer Guide for more information about such security and access controls.

4 Business Operations

4.1 New Orders
Riser Connect can be ordered through a Cyxtera Account Representative who will provide the customer a sales order for execution. An Ecosystem Connect must be in place prior to ordering Riser Connect. The customer may select a specific Ecosystem Connect bundle and port assignment for termination of the Riser Connect circuit during the provisioning process or the Cyxtera Implementation Specialist assigned to the order will choose the next available port on an existing Ecosystem Connect bundle terminating into the customer space.

4.1.1 Letter of Authority / Connecting Facility Assignment (LOA/CFA)
Cyxtera will order the 3rd party cross connect to the terminating party’s termination location specified in the LOA/CFA given to the customer by the Z-end connecting party. The
customer will be required to provide the LOA/CFA to Cyxtera who will use the authorization to order the 3rd party cross connect on behalf of the customer.

4.2 Changes to Ordered Services and/or Existing Services
Unless otherwise agreed by Cyxtera, in its sole discretion, if the customer requires any changes to (a) an ordered Riser Connect Service before installation of such Service or (b) a previously installed Riser Connect Service, they will need to submit a disconnect order and a new order to implement the change, and additional charges may apply. Hot Cuts and/or Parallel Cuts are not supported for Riser Connect.

4.3 Disconnects
Disconnects may be requested (a) in the customer portal made available by Cyxtera to customer for such purpose, or (b) through any other process permitted by Cyxtera. Additional details can be obtained from your Account Representative.

4.4 Expedite Requests
Request for expedited installation of Riser Connect can only be approved by Cyxtera’s Service Delivery team. Upon receipt of such a request, Cyxtera’s Service Delivery Team will take various factors into account when considering whether or not to approve such request, including, but not limited to, products and services being purchased in the order, scope and scale of the installation of the services being purchased in the order, current Cyxtera workload and/or projects already in flight at the data center, customer’s existing environment and procurement lead-times. An expedite fee may apply. Contact your Cyxtera Account Representative to inquire about an expedite request.

5 Service Level Objectives
Cyxtera offers Service Level Objectives for Riser Connect. A Service Level Objective (“SLO”) is a metric which Cyxtera makes all reasonable efforts to achieve during standard business operations. Cyxtera does not offer remediation for missed Service Level Objectives.

Riser Connect is governed by the following SLOs:

5.1 Install
Cyxtera will make all commercially reasonable efforts to complete installation and testing of a Riser Connect within 20 business days of an accepted sales order.
5.2 Uptime
Cyxtera will make all commercially reasonable efforts to ensure that a Riser Connect is available 100% of the time.

A Riser Connect is considered unavailable when the passive physical media used for the connection fails and the endpoints of the connection are not able to maintain communication. A Riser Connect does not employ a protection scheme to re-route traffic in the event of equipment or passive physical media failure. Cyxtera views each Riser Connect order as a stand-alone item and does not build a relationship between different orders.

6 Contract Terms
A Riser Connect order incurs a non-recurring charge to cover the materials and labor associated with installation as well as the monthly recurring charges in connection with the provision of such Riser Connect.

Riser Connect is considered a month-to-month service and may be cancelled with a 30-day notice and customer shall have no liability for early termination charges in connection with such a cancellation. There is no charge to disconnect a Riser Connect.

3rd-party cross connects ordered by Cyxtera on behalf of the customer in connection with Riser Connect are subject to the terms and conditions set forth by the 3rd-party provider, including, but not limited to, cancellation, liability for early termination charges and charges to disconnect such 3rd-party cross connects.
